CPYRGHT

iant of the north country, James River Corporation pulp and paper mills in
 erlin spew steam and enough sulfides to coin the local adage, "Want to find
 erlin? Just follow your nose." High stacks help disperse odors as part of a
 7-million-dollar outlay for pollution abatement. Complaints are few. The mills

directly and indirectly provide 2,300 jobs in the depressed north. Midstream in the
 Androscoggin River, men made islets. Foreground, channelled log drives in the flash
 days of virgin forests, when cutters denuded many of the state's mountainsides.
 Today, however, renewed forestlands cover a remarkable 86 percent of the state.
